General information

Introduction

The F011 is a local indicator to display the running total and accumulated total. Total can be reset to zero by pressing the CLEAR button twice. A non-resettable accumulated total is available with eleven digits. The measuring unit to be displayed is simply selected through an alpha-numerical configuration menu. No adhesive labels have to be put on the outside of the enclosure: a weather proof and userfriendly solution! A wide selection of options further enhance this models capabilities, including Intrinsic Safety for hazardous area applications.

Display

The display has large 17mm (0.67") and 8mm (0.31") digits show both totals simultaneously. Both totalizers are backed-up in EEPROM memory every minute. As the F011 has been designed for field mounted applications, a smart display update function has been incorporated. Related to the lower temperatures, the update frequency of the LCD is tuned automatically to achieve a readable display even at -40°C / -40°F.

Backlight

For those applications where readability during day and night is an issue, a bi-color backlight is available. The background color can be set to green or amber and the intensity can be adjusted from the keyboard. The display is a transfective type, which means that a high contrast reading is guaranteed in full sunlight as well as during the night. This backlight option is also available Intrinsically Safe.

Configuration

All configuration settings are accessed via a simple operator menu which can be pass-code protected. Each setting is clearly indicated with an alphanumerical description, therefore avoiding confusing abbreviations and baffling codes. Once familiar with one F-series product, you will be able to program all models in the series without a manual. All settings are safely stored in EEPROM memory in the event of sudden power failure.

Signal input

The F011 will accept most pulse and analog input signals for flow or mass flow measurement. The input signal type can be selected by the user in the configuration menu without having to adjust any sensitive mechanical dip-switches, jumpers or trimmers. The analog input version is even available as 4 - 20mA input loop powered display.

Power supply

Several power supply options are available to power the F011 and sensor. Most popular is our battery powered version with a long life lithium battery which will last up to five years.

For analog sensors, a 4 - 20mA loop powered version is available as well. A real sensor supply is offered with the 24V AC/DC or 115 - 230V AC power supply option.

Hazardous areas

For hazardous area applications, ATEX Intrinsically Safe certification is pending according to $\text{Ex II 1GD EEx ia IIB / IIC T4 T100}^\circ\text{C}$ with an allowed operational temperature of -40°C to +70°C (-40°F to +158°F). CSA and IEC certification is expected to be available in november 2005.

A flame proof enclosure with ATEX certification offers the rating $\text{Ex II 2G EEx d IIB T5}$.

Enclosures

Various types of enclosures can be selected. As standard the F011 is supplied in an ABS panel mount enclosure, which can be converted to an IP67 / NEMA 4X ABS field mount enclosure by the addition of a back case. Most popular is our aluminum field mount enclosure with IP67 / NEMA 4X rating. Both European or U.S. cable gland entry threads are available.

Hazardous area applications

ATEX certification of the F011-XI for use in Intrinsically Safe applications is pending. It is going to be approved according to Ex II 1GD EEx ia IIB/IIC T4 T100°C for gas and dust applications with an operational temperature range of -40°C to +70°C (-40°F to +158°F).

IEC certification with the same ratings is expected to become available in november 2005, just as the CSA certification. The CSA (US/C) rating will be: Intrinsically Safe Class I, II, or III, Zone 0 or 1, Division 1 or 2, Group A through G (I.S.) and Non-Incendive Division 2 and Zone 2 (N.I.).

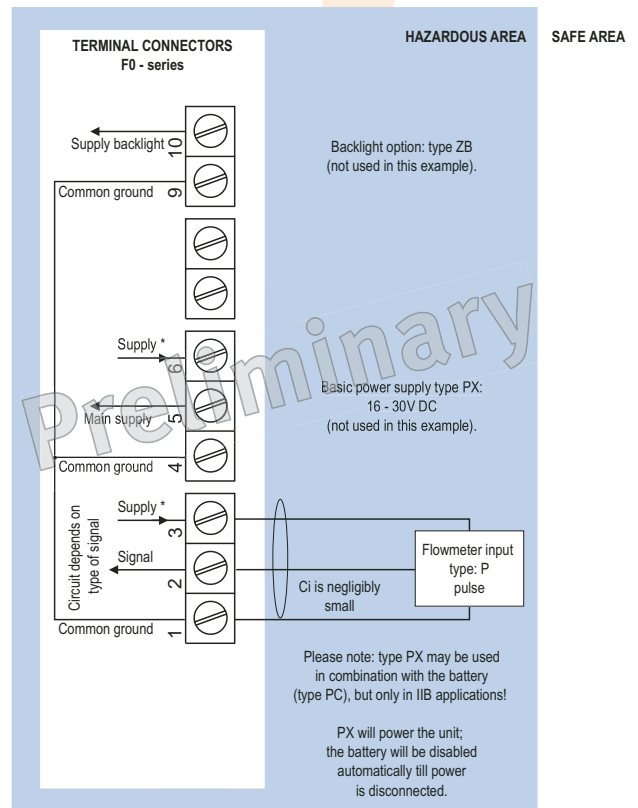

A flame proof enclosure with rating Ex II 2G EEx d IIB T5 is available as well. Please contact your supplier for further details.
